High-velocity automated packaging

Boost your packaging strategy with fully-automated, high-velocity technology.

There are many driving factors behind the parcel packaging designs needed today. Customers want fast shipping in sustainable packaging. Carriers want lower shipping volume. Companies want lower labor, packaging and shipping costs. While this can seem overwhelming, there is a solution that can solve all of these packaging issues and more: automated packaging technology.

The CVP Everest Automated Packaging Solution optimizes all steps of package fulfillment by creating fit-to-size boxes for variable-dimension, single- or multi-item orders. With the CVP Everest you can see immediate return on investment and package orders with complete confidence.

Lower labor costs by an average of 88% while increasing packaging efficiencies.

Reduction in DIM weight costs by creating the smallest parcel needed.

Reduction in material costs minimize or eliminate void fill usage with a fit-to-size box. Additionally, we are agnostic to a fan-fold provider.

Avoid damaged goods with an extremely strong box, maximizing the fill rate, protecting your valuable items and reducing returns.

High-velocity packaging allows later cut-off times due to the speed of packaging, enabling same day delivery.

Alleviate peak season challenges with auto-boxing of hard or soft goods, meeting higher customer and company demands.

Improve customer experience with branded corrugate, customized enclosures and strong shipping-proof boxes.

Strengthen sustainability and become a leader as consumers prefer to purchase from eco-friendly companies.

# The CVP Everest Automated Packaging Solution.

The pinnacle of automated packaging technology.

1,100 parcels per hour is the new standard.

Our fit-to-size automated packaging solution measures, constructs, seals, weighs and labels each single- or multi-item order in as little as three seconds. The CVP also auto-boxes hard or soft goods without any additional equipment or operators needed, saving you valuable time and money.

This proven packaging solution generates the smallest parcel needed while optimizing all steps of parcel fulfillment, reducing labor, shipping and material costs.

Utilized in a variety of industries, including e-commerce, retail, third-party logistics (3PL), wholesale and manufacturing, automated packaging can improve the customer experience while solving many of today's shipper's biggest pain points.

One, two, or three corrugate feeders use fan-fold material for quick replenishment, reduced inventory, and usage savings. We are agnostic to a fan-fold supplier.

One, two, or three corrugate feeders for the lidding process.

Reduce DIM weight dependent freight costs with the correct-sized box for every order.

Two lid applications work in parallel to fully seal each custom box at high speeds.

Reduce labor costs by an average of 88% and ensure smooth workflows even during peak production periods.

Carrier compliant labels are created and applied to ensure accurate delivery. High-speed print and apply systems.

Single or dual induct stations to produce packing speeds and maximize operational efficiency.

Scanner captures 3D image of each unique parcel regardless of shape or texture to determine the minimum box size required.

Increase productivity as hard or soft single- or multi-item orders are quickly configured into custom boxes.

Less environmental impact by replacing material usage and box size for a smaller carbon footprint.

Adhesive sealing of the box bottom is secured by side guides for complete closure.

Customer focused service solutions Quadient offers remote support, on-site scheduled service calls, and a dedicated OEM parts distribution center.

Extremely strong box will protect your valuable items and reduce returns.

Wide Range of Package Sizes
Smallest Size
7.1" W X 9.4" L X 2" H
Largest Size
23.6" W X 23.6" L X 13.8" H
And all sizes in between
